

START ATTRACTOR

We believe inspiring conversations are not enough to move ideas into the world. We believe in real collaborations that create opportunities and nurture innovation.

START CLUB

Start Club raises the signal: fewer, better connections turned into measurable outcomes in 30–90 days—pilots, partnerships, talent and new ventures—that elevate the quality of our innovation ecosystem.

Start Club is built for outcomes, not attendance.

Start Club brings together companies, startups, professionals, researchers and investors through invitation-only working sessions, curated introductions, and a goal-driven challenge-to-pilot pathway.

What you get

Curated introductions: high-signal matchmaking based on your priorities—shortlist, warm intros, and a next-step plan.

Member-only working sessions: invitation-only sessions with founders, executives and researchers—designed for candid discussion and concrete follow-up.

Challenge → Pilot pathway: turn an innovation need into an activated collaboration: define the challenge and success metrics, scout solutions, and launch pilots with startups or research teams.

How it works: 30 - 90 days

Define the goal: pilot, partnership, talent, visibility, scouting—aligned to your sector and timeframe.

Curate and introduce: we connect you with the most relevant members and opportunities, with context and clear next steps.

Activate outcomes: working sessions, challenges, showcases and follow-up designed to turn momentum into execution.

How it starts

Kickoff (30-45 min): goals, sector focus, success metrics

Matchmaking plan: curated profiles + introduction roadmap

Priority access: next relevant working sessions or showcase + follow-up checkpoint

To speed up matching, share: goal + sector + timeline (30–90 days).

Is this a networking club?

No. Start Club is built around curated introductions and member-only working sessions designed to activate real collaborations.

START ATTRACTOR

START CLUB

What you achieve

Faster access to the right partners and decision-makers

Clearer pilot pathways from needs to execution
